

EXPERIMENT 8

Create storyboards to represent the user flow for a mobile app using Balsami

NAME:POOJA D

ROLL NO:240701385

Aim

To design and visualize the user journey of a mobile food delivery application by creating low-fidelity storyboards using Balsamiq, helping to understand user interactions and app flow from browsing to order completion.

Tools Used

- **Balsamiq Wireframes** – for creating low-fidelity UI sketches and storyboards
- **Computer/Laptop** – for designing and editing
- **Web Browser** – to access Balsamiq (if using cloud version)

Procedure

1. Home Screen

- Displays search bar and food categories (Pizza, Burger, Chinese, etc.)
- Shows popular restaurants with ratings and delivery time
- **Purpose:** Helps users explore and find restaurants or dishes easily

2. Menu Screen

- Displays selected restaurant's menu items with prices
- Includes categories (Pizza, Pasta, Drinks, Desserts)
- "Add to Cart" option for each item
- **Purpose:** Allows users to browse and select food items

3. Cart Screen

- Shows selected items with quantity controls (+ / -)
- Displays subtotal, delivery fee, and total cost
- Checkout button available
- **Purpose:** Lets users review and modify their order before purchase

4. Checkout Screen

- Collects delivery details (name, phone, address, pincode)
- Offers payment options (Cash on Delivery, Card, UPI/Wallet)
 - “Place Order” button
- **Purpose:** Final step to confirm user details and payment

The image shows a mobile application interface for a checkout screen. At the top, the status bar displays the time 9:41, signal strength, and battery level. Below the status bar is a navigation bar with a back arrow on the left and the title "Checkout" in the center. The main content area is divided into two sections. The first section, titled "Delivery Address", contains five input fields: "Full Name", "Mobile Number", "Address Line 1", "Address Line 2 (Optional)", and two side-by-side fields for "City" and "Pincode". The second section, titled "Payment Method", contains three radio button options: "Cash on Delivery" (which is selected), "Credit / Debit Card", and "UPI / Wallet". At the bottom of the screen is a large, grey, rounded rectangular button labeled "Place Order".

5. Order Confirmation Screen

- Displays confirmation message (Order placed successfully)
- Shows order summary (items, total amount)
- Provides estimated delivery time
- Options like "Track Order" or "Back to Home"
- **Purpose:** Confirms order completion and provides next steps

Result

A complete storyboard representing the user flow of a food delivery mobile app was successfully created using Balsamiq. The design clearly illustrates each stage of user interaction—from browsing food items to placing an order—making it easier to understand app functionality, improve usability, and communicate design ideas effectively.
